

Innovative Sales and Regulatory Automation Solutions

Insurance Technologies provides innovative sales and regulatory automation solutions to the insurance and financial services industries. Our products, ForeSight® (sales illustration) and FireLight® (e-application), supply carriers and distribution partners the accurate tools needed to streamline and accelerate the sales process allowing more time to develop new sales opportunities.

Unique Domain Expertise

Our company is made of knowledgeable technology and financial industry experts allowing us to develop best of class products and highly regarded customer service. Our team consists of technology and industry experts who have been involved in the financial services industry either in software development, selling products in the field, or working for financial or insurance home offices. Our team's certifications include ASA, CLU, ChFC, FLMI, FSA, M.A.A.A., MCSD, MCSE, Series 6, Series 7, Series 63, PMP and more. Insurance Technologies applies deep domain knowledge with some of the brightest technology minds to develop sales automation solutions that simplify and enhance sales processes.
