FireLight® **Mobile**

FireLight

Maximize Sales Opportunities with the Power of Mobility

In today's fast moving and competitive industry, leveraging technology that maximizes sales opportunities and enhances the customer experience is key to success. Built with innovative technology, FireLight® e-Application makes conducting business anytime anywhere, quick and easy.

The Power of Being Mobile

Increase mobility and productivity with all the features and capabilities of FireLight, whether capturing business connected on a tablet or disconnected on a laptop. With integrated business rules, in-good-order sales will be completed and processed, maximizing anytime sales opportunities.

ComPADible Technology

✓ **FireLight Supports Popular Tablets:**

• Apple iPad
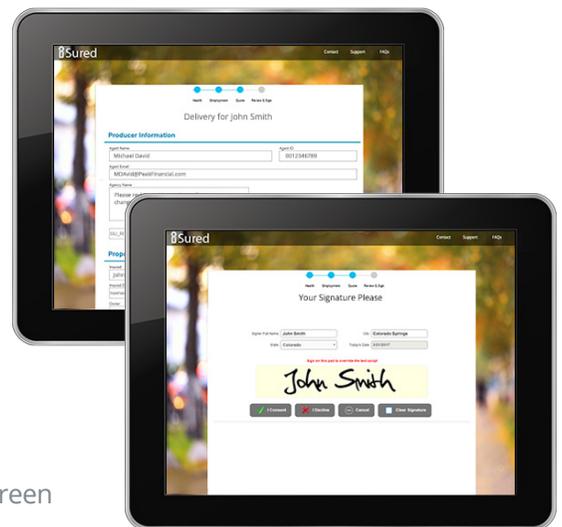

• Microsoft Surface

• Android Tablets

✓ **User-Friendly Touch-Screen:** FireLight provides an intuitive mobile interface with easy to use buttons, screen rotation ability and the straightforward FireLight workflow, requiring limited to no training.

✓ **On Screen Tablet e-Signature:** FireLight empowers agents to quickly and securely close more business with tablet on-screen e-signature capture capabilities.

✓ **Electronic Audit Trail:** FireLight automatically tracks electronic communications, application changes, signature captures and submission information associated with each sale no matter if the agent is accessing the platform on a desktop, laptop or tablet device, keeping records organized and accessible.

Disconnected Technology

FireLight disconnected provides the full functionality of FireLight e-Application including the intelligent data entry, rules engine and e-signature capture to deliver in-good-order processing when Internet connectivity is not available.

✓ **FireLight Disconnected Native App Supports:**

• Windows Devices

• iOS Apple Devices

FireLight provides additional mobile access to capture in-good-order e-application data in disconnected sales situations through the FireLight eApp™, an iPad native app available on iTunes app store.

INSURANCE TECHNOLOGIES

Sales automation solutions for the insurance and financial services industries.
